EXECUTIVE SUMMARY

Beyorch Digital delivers the first governance token that is backed by merchant loan obligations, thus strengthening a crucial inefficiency for the crypto world. Investors receive better protection and reliability with performing asset-backed tokens. The innovative model of Beyorch Digital brings the best of both worlds to the crypto community, as well as strong, sustainable value, and total governance in helping make future decisions. Transparency is guaranteed through blockchain technology, smart contracts, and algorithmic processes that are executed by the Beyorch Digital blockchain pioneer.

Beyorch Digital

The world's first Crypto Hybrid-Merchant Bank

The world's access to Crypto backed pre-IPO's, lending and investing.

TOKENOMICS

Liquidity is most important to us as a Hybrid Merchant Bank. Each transaction has a 5% slippage applied to it. 2% of that goes straight to the Liquidity wallet. The remaining 2% is distributed among token holders, with the remaining 1% going to marketing.

Token Allocation

Presale: 30% Public Sale/IDO Launch: 50.0%
Team 10% Advisors 5% Partners 5%.

Tax Fee Allocation

Liquidity: 40.0% Redistributed to holders: 40.0%
Marketing Wallet: 20.0%.

BEP20 TOKEN

Beyorch Digital Token (BDIG) is currently issued on the Binance smart chain bep-20 Network. Here is a list of some wallets with support of Beyorch Digital (BDIG) BEP 20 tokens:

METAMASK WALLET

[HTTPS://METAMASK.IO](https://metamask.io)

TRUST WALLET

[HTTPS://TRUSTWALLET.COM](https://trustwallet.com)

TOKEN CAPABILITIES

01 2% AUTOMATIC LIQUIDITY
2% of every trade is locked into Liquidity Pool to create a steadily rising price floor.

02 PORTFOLIO GROWTH
Holders of BDIG Tokens will see their investments grow overtime. Our token has reflection which will contribute to a passive share of income to each token holder.

03 MANUAL TOKEN BURN
Beyorch Digital's manual burns make the protocol balance with the fluctuating performance of the market. The manual burns contribute to the long-term benefits of our token holders.

05 ASSET-BACKED TOKEN
The Beyorch Digital Token is a governance and utility backed by the underlying assets of Beyorch Inc's merchant loan portfolio.

06 PASSIVE STAKING INCOME
Beyorch Digital Tokens are a haven as they provide passive income in a common interest as high as 18% APY.

07 ADDITIONAL UTILITY
Beyorch Digital Tokens offer additional utility features such as discounted interest rates for merchant loan fees when loan applicants use Beyorch Digital Tokens.

TOKEN UTILITY

06 PREFERENTIAL BORROWING RATES
Beyorch Digital Tokens holders will receive the best rates offered on all loan programs.

07 INSTANT CREDIT LINES AND PREMIUM SUPPORT
Beyorch Digital Tokens holders will be automatically qualified for instant credit lines and our Beyorch Digital visa rewards card.

MOVING THE FUTURE CLOSER

OUR MISSION AND PURPOSE

Beyorch Digital has found purpose in building an improved financial eco-system that allows investors to earn more and lower financial risk. This ongoing mission is carried into the traditional equities market, where the merchant subsidiary of Beyorch will enable investors to buy stock in early unicorn's pre-ipo. These companies will have brand establishment, market momentum, and scalability—the known traits carried by all nationwide and global companies.

BEYORCH DIGITAL BLUEPRINT

Beyorch Digital's business model is not dissimilar to that of its parent company Beyorch inc. It allows customers to invest their cryptocurrency for returns, makes loans in dollars to customers who put up cryptocurrency as collateral, and it lends crypto to small businesses, companies, and major institutions that need it. Beyorch Digital offers interest of up to 18 percent per year on crypto deposits and staking, compared to a national average of 0.06 percent savings deposits at traditional banks.

Beyorch Digital Token is backed by merchant loan obligations from its parent company Beyorch Inc., thus strengthening a crucial inefficiency for the crypto world. Investors receive better protection and reliability with performing asset-backed tokens. The innovative model of Beyorch Digital brings the best of both worlds to the crypto community, as well as strong, sustainable value, and total governance in helping make future decisions. Beyorch Digital has found purpose in building an improved financial eco-system that allows investors to earn more and lower financial risk.

PROBLEM

LACK OF TRANSPARENCY AND CONTROL

Although bitcoin, Ethereum, and other emerging cryptocurrencies are becoming the most widely owned digital assets class around the globe, crypto owners receive limited insight and governance within the investment. The projected total value of those assets is expected to grow to over \$5 trillion by 2025. The industry is rapidly growing in volatility, and investors want more control over overall outcomes.

LACK OF QUALITY OPTIONS

An overwhelming number of crypto companies offering the same thing makes choosing the right company often difficult. Digital asset owners' options are limited to coins and tokens. The vast majority has little to no worth or utility, making it harder for a steady increase in overall value.

SOLUTION

EARN MORE OF WHAT'S YOURS

Instead of guessing and making hard decisions, investors, miners, and entrepreneurs have better-controlled outcomes with the Beyorch Digital governance token. Digital investors experience better transparency, voting rights, and even options to stake their investment for interest gains, quickly executed in Beyorch Digital's smart contract.

ASSET-BACKED TOKENS

Special consideration to asset-backed cryptocurrency is needed to help sustain exceptional market results. The federal reserve central banking system backs the us fiat currency making the dollar near impossible to fail. Beyorch digital tokens' long-term value is being backed and supported by Beyorch's performing assets via merchant loan obligations.

HOW BDIG TOKENS ARE USED

Beyorch Digital Tokens (BDIG) support commercial loans in the Beyorch merchant ecosystem. Beyorch Professional Service clients save money in interest and lower monthly payments when applying for a loan by using Beyorch Digital Tokens.

E.g., company x wants to borrow \$20 million to expand operations.

OPTION A:

Beyorch underwrites the loan with 6.5 percent compounded annual interest with a down payment of 5 percent.

OPTION B:

Company x uses BDIG tokens for the down payment and pays 3.5% compounded yearly interest. Our objective for creating the BDIG token is to extend opportunities across our digital and merchant community. The value begins with staking programs, competitive interest rewards, voting on products, and Beyorch Digital credit cards. Beyorch Digital Token is the next generation for merchant services.
